## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 10, 11, 14, 17-41, and 48-50, drawn to methods of breed determination using a nucleic acid, classified in class 435, subclass 6, for example.
  - II. Claims 1-7, 9, 12-14, 21-24, 29-31, 39-41, and 49-50, drawn to methods of breed determination using a protein, classified in class 435, subclass 7.1, for example.
  - III. Claims 42-47, drawn to kits, classified in class 536, subclass 24.3 or class 424, subclass 130.1, for example.
2. It is noted that Applicant must further elect a single species from claims 6 and 29, and a single polymorphism in claim 35. Each of these species (or polymorphisms) represent patentably distinct inventions.
3. The inventions are distinct, each from the other because of the following reasons:
  - A) Inventions I and II are separate and distinct, as the nucleic acids of group I are not used in the methods of Group II. As such, the inventions would require search in separate and non-overlapping areas, imposing an undue burden upon the examiner if not restricted.
  - B) Inventions (I and II) and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the kits of group III can be used in nucleic acid purification and aptamer assays.

Art Unit: 1656

4. Because these inventions are distinct for the reasons given above and have acquired a different status in the art as demonstrated by their different classification and recognized divergent subject matter and because inventions I-III require different searches that are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
